

Novatech Information Security Policy

Chapter 1 General Provisions

Article 1 (Purpose) This policy sets the standards for protecting the Company's information assets from threats and managing them securely.

Article 3 (Information Grades) All information assets are classified and managed into the following three grades according to importance.

Grade	Examples	Handling
Confidential	HR, payroll, customer personal data	Encrypted storage, access control
Restricted	Internal plans, contracts	Shared within the company only
Public	Notices, promotional materials	No restrictions

Chapter 2 Access Control

Article 6 (Access Rights) Access rights to internal systems are granted at the minimum scope needed for the job, and any change of rights requires the approval of the Security Team.

Article 7 (Remote Access) When accessing internal systems from outside, you must use the company-designated VPN (identifier code SEC-VPN-01). Direct access from a personal network to internal systems is prohibited. VPN account usage is reviewed every 6 months.

Article 8 (External Network Blocking) Work PCs block connections to unauthorized external networks and public Wi-Fi.

Chapter 3 Accounts and Media

Article 9 (Passwords) Every account password must be at least 12 characters long and must be changed every 90 days. The 3 most recently used passwords cannot be reused.

Article 12 (External Storage Devices) Use of external storage devices such as USB drives requires prior approval from the Security Team. Approved devices are assigned identifier codes as below.

Device Type	Identifier Code	Notes
Secure USB	SEC-USB-##	Encryption required
Remote VPN	SEC-VPN-01	Company-wide shared
External laptop	SEC-NB-##	Removal request required
